The principal business activities of the branches are providing fumigation services and pest control for agricultural and forestry products as well as other objects.

2. BASIS OF PREPARATION OF THE SEPARATE FINANCIAL STATEMENTS FOR THE THIRD QUARTER OF 2025 AND ACCOUNTING PERIOD

Basis of preparation of the separate financial statements for the third quarter of 2025

The accompanying separate financial statements for the third quarter of 2025 are presented in Vietnamese Dong (VND), prepared on a historical cost basis and in accordance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, and relevant legal regulations on the preparation and presentation of quarterly financial statements.

The accompanying separate financial statements for the third quarter of 2025 are not intended to present the financial position, results of operations, and cash flows in accordance with generally accepted accounting principles and practices in countries other than Vietnam.

The Company also prepares the consolidated financial statements for the third quarter of 2025. Users of these financial statements should read this separate financial statements for the third quarter of 2025 together with the consolidated financial statements for the nine-month period ended September 30, 2025, to obtain a comprehensive understanding of the Company's operations.

Accounting period

The Company's fiscal year begins on January 1 and ends on December 31.

These separate financial statements for the third quarter of 2025 are prepared for the nine-month period ended September 30, 2025.

3.SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following are the principal accounting policies adopted by the Company in preparing the separate financial statements for the third quarter of 2025:

Accounting estimates

CÔI

The preparation of the separate financial statements for the third quarter of 2025 in accordance with Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System, and relevant legal regulations on the preparation and presentation of quarterly financial statements requires the Board of General Directors to make estimates and assumptions that affect the reported amounts of liabilities and assets, as well as the disclosure of contingent liabilities and assets at the reporting date, and the reported amounts of revenue and expenses during the period. Although these accounting estimates are made based on the best knowledge of the Board of General Directors, actual results may differ from those estimates and assumptions.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits at banks, and short-term investments (with original maturities of not more than three months) that are highly liquid, readily convertible into known amounts of cash, and subject to an insignificant risk of changes in value.

Financial investments

Held-to-maturity investments

Held-to-maturity investments comprise investments that the Company has the intention and ability to hold until maturity. These include term deposits at banks.

Interest income from held-to-maturity investments acquired after the date of purchase is recognized in the separate statement of profit or loss for the third quarter of 2025 on an accrual basis.

Loans receivable

Loans receivable are stated at cost less provision for doubtful debts. The provision for doubtful loans is made in accordance with prevailing accounting regulations.

Investments in subsidiaries

A subsidiary is an entity controlled by the Company. Control is achieved when the Company has the power to govern the financial and operating policies of the investee so as to obtain benefits from its activities.

Investments in subsidiaries are initially recognized at cost. The Company recognizes in the separate statement of profit or loss for the third quarter of 2025 the share of accumulated net profit earned by the subsidiary after the date of investment. Any distributions received other than profit sharing are considered recoveries of investment and are deducted from the carrying amount of the investment.

Investments in subsidiaries are presented in the separate balance sheet for the third quarter of 2025 at cost less provision for impairment (if any). A provision for impairment is made when there is objective evidence that the value of the investment has been impaired as at the end of the accounting period.

Receivables

Receivables represent amounts recoverable from customers or other parties. They are stated at carrying value less provision for doubtful debts.

The provision for doubtful debts is made for receivables that are overdue or those deemed doubtful of collection due to the debtor's liquidation, bankruptcy, or other similar financial difficulties, as assessed by the Board of General Directors.

1G

PH FR

Inventories

Inventories are stated at the lower of cost and net realizable value.

- -For merchandise, raw materials, tools, and supplies: the cost of inventories includes purchase costs and other directly attributable costs incurred in bringing the inventories to their present location and condition.
- -For work in progress and finished goods: the cost of inventories includes direct materials, direct labor, and applicable manufacturing overheads incurred to bring the inventories to their current location and condition.

The Company applies the perpetual method in accounting for inventories. The cost of inventories is determined using the weighted average method. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated selling, marketing, and distribution expenses.

The Company makes a provision for inventory obsolescence at 100% for expired items.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of tangible fixed assets acquired by purchase comprises the purchase price and all directly attributable costs incurred in bringing the asset to its working condition for its intended use.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

Buildings and atmost	Years
Buildings and structures	05 - 50
Machinery and equipment	03 - 07
Vehicles	05 - 10
Office equipment	03 - 05
Others	03 - 06

Gains or losses arising from the disposal or sale of fixed assets, representing the difference between the net proceeds and the carrying amount of the assets, are recognized in the separate statement of profit or loss for the third quarter of 2025.

Leases

A lease is classified as a finance lease when substantially all the risks and rewards incidental to ownership of the asset are transferred to the lessee. All other leases are classified as operating leases.

When the Company is a lessor

Operating lease income is recognized on a straight-line basis over the lease term. Initial direct costs incurred in negotiating and arranging an operating lease are either recognized as expenses when incurred or amortized over the lease term on a straight-line basis consistent with the recognition of lease income.

When the Company is a lessee

A lease is classified as an operating lease when the lessor retains substantially all the risks and rewards incidental to ownership of the asset. Operating lease expenses are recognized in the separate statement of profit or loss for the third quarter of 2025 on a straight-line basis over the lease term. Any payments received or receivable to facilitate the negotiation of an operating lease are also recognized on a straight-line basis over the lease term.

NÃ

No. 29, Ton Duc Thang Street, Sai Gon Ward, Ho Chi Minh City

Intangible fixed assets and amortization

Intangible fixed assets comprise land use rights and computer software, stated at cost less accumulated amortization.

The cost of an intangible fixed asset acquired by purchase includes the purchase price and all directly attributable costs incurred in bringing the asset to its working condition for its intended use.

Intangible fixed assets are amortized using the straight-line method over their estimated useful lives as follows:

I and ! 14	Years
Land use rights	20 - 50
Computer software	03 - 05

Investment properties

Investment properties comprise land use rights and buildings held by the Company to earn rental income or for capital appreciation. Investment properties held for rental purposes are stated at cost less accumulated depreciation. Investment properties held for capital appreciation are stated at cost less impairment losses. The cost of purchased investment properties includes the purchase price and directly related costs such as legal service fees, registration tax, and other transaction costs. The cost of self-constructed investment properties comprises the total construction settlement value or other directly attributable costs.

The Company's investment properties include:

- Land use rights with indefinite terms, which are not amortized; and
- Buildings and structures, which are depreciated using the straight-line method over estimated useful lives ranging from 17 to 25 years.

Prepayments

Prepayments include expenses actually incurred that relate to the operations of more than one accounting period, such as insurance, office rent, repair and renovation costs, tools and equipment issued for use, and other prepaid expenses.

Office rent and insurance represent amounts paid in advance and are amortized on a straight-line basis over the lease or insurance period, respectively, in the separate statement of profit or loss for the third quarter of 2025.

Expenses related to repairs, renovations, tools and equipment issued for use, and other prepaid amounts expected to bring future economic benefits to the Company are capitalized as prepaid expenses and amortized to the separate statement of profit or loss for the third quarter of 2025 on a straight-line basis in accordance with prevailing accounting regulations.

Revenue recognition

Revenue from sale of goods

Revenue from sale of goods is recognized when all of the following five (5) conditions are satisfied:

- (a) The Company has transferred substantially all the risks and rewards of ownership of the goods to the buyer;
- (b) The Company no longer retains managerial involvement or control over the goods sold;
- (c) The amount of revenue can be measured reliably;
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and

No. 29, Ton Duc Thang Street, Sai Gon Ward, Ho Chi Minh City

For the quarter 3 ended on September 30, 2025

(e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from services rendered

Revenue from service transactions is recognized when the outcome of the transaction can be measured reliably. Where a service transaction extends over several accounting periods, revenue is recognized in the period by reference to the stage of completion of the transaction at the balance sheet date. The outcome of a transaction can be measured reliably when all of the following four (4) conditions are satisfied:

- (a) The amount of revenue can be measured reliably;
- (b) It is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) The stage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest income and investment income

Interest income on deposits and loans is recognized on an accrual basis, determined based on the outstanding balance and the applicable interest rate.

Investment income is recognized when the Company becomes entitled to receive such income.

Deductions from revenue

Deductions from revenue include trade discounts.

Revenue deductions arising in the same period as the sale of goods or services are offset against revenue for that period. If trade discounts or other deductions relate to goods or services sold in a prior period but arise before the date of issuance of the separate financial statements for the third quarter of 2025, such deductions are recognized as a reduction of revenue for the current reporting period.

Foreign currencies

Transactions in foreign currencies are translated into Vietnamese Dong at the exchange rate ruling at the transaction date. Monetary items denominated in foreign currencies at the end of the period are translated at the exchange rate quoted by the commercial bank with which the Company regularly transacts at the balance sheet date. Exchange differences arising are recognized in the separate statement of profit or loss for the third quarter of 2025.

Borrowing costs

Borrowing costs are recognized as expenses in the period in which they are incurred, except where they are capitalized in accordance with Vietnamese Accounting Standard No. 16 "Borrowing Costs." Accordingly, borrowing costs directly attributable to the acquisition, construction, or production of a qualifying asset that takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of that asset until it is ready for use or sale. Income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of the asset. For specific borrowings relating to the construction of fixed assets or investment properties, borrowing costs are capitalized even if the construction period is less than 12 months.

Taxes

Corporate income tax represents the total amount of current and deferred tax.

Current tax is calculated based on taxable income for the period. Taxable income differs from profit before tax as presented in the separate statement of profit or loss for the third quarter of 2025 because taxable income excludes items of income or expense that are taxable or deductible in different periods, and it also excludes items that are non-taxable or non-deductible.

Deferred income tax is determined on the temporary differences between the carrying amounts and the tax bases of assets and liabilities in the separate financial statements and is recognized using the balance sheet liability method. Deferred tax liabilities are recognized for all taxable temporary differences, while deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences can be utilized.

Deferred income tax is calculated using the tax rates that are expected to apply in the period when the asset is realized or the liability is settled. Deferred tax is recognized in the separate statement of profit or loss for the third quarter of 2025, except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Deferred tax assets and deferred tax liabilities are offset when the Company has a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax liabilities on a net basis.

The determination of the Company's income tax is based on prevailing tax regulations in Vietnam. However, these regulations are subject to change from time to time, and the final determination of corporate income tax is dependent on the outcome of examinations conducted by the competent tax authorities.

Other taxes are applied in accordance with the prevailing tax laws in Vietnam.
